103 Megapixel Thermoelectric Peltier Cooled Camera  
with CoaXPress 2.0 Interface

The VP-103MX2, the latest model of the industrial proven VP series, is a new 103-megapixel CoaXPress camera and adopts the cutting-edge High Speed CMOS Image Sensor.

The VP-103MX2 camera offers up to 24.7 frames per second at 11,264 × 9,200 resolution.

This camera uses thermoelectric Peltier (TEC) cooling technology developed for and used by many demanding medical market customers. The TEC maintains the operating temperature of the CMOS image sensor at up to 15 degrees below ambient temperature. This camera provides a stable operating condition and the ability to expose for a long period of time to increase camera sensitivity.

Featuring the stable operating capability and high resolution, this camera is ideal for demanding applications such as FPD, PCB and semiconductor inspections.
